To have a Nordelettronica repair service avoiding possible problems and delays, it is necessary following this procedure:

- Describe in the appropriate field, in the most detailed way possible, the defect or problem found on the product.
- Indicate in the compilation the type of service requested.
- Standard repair: it is the simplest and least expensive procedure that involves receiving the repaired or replaced product, at the discretion of Nordelettronica, without necessarily having to draw up a repair report.
- By ticking the relative boxes, indicate if a quote is required to be submitted to your approval, before proceeding with the repair.
- Repair report request, a repair report will be sent.
- The shipment of the material to Nordelettronica must always include the completed, dated and signed material return forms.
- Shipping costs to Nordelettronica and to the customer are always charged to the customer.
