

LIGHT, LIGHTER,

# LevelVan

The first hydraulic levelling system with carbon cylinders for camper vans.

**INNOVATIVE**  
carbon cylinder  
technology

# LevelVan

LESS WEIGHT. **MORE PAYLOAD.**

---

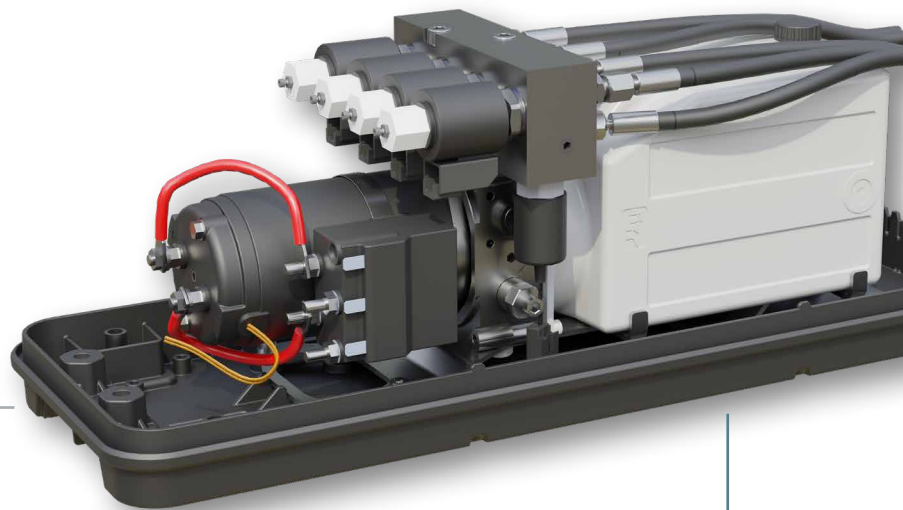

## **Sunrise on the mountain or sunset by the sea? Shall we drive on, or shall we stay here?**

With a camper van, you have the freedom to go wherever you like. And with a van equipped with LevelVan, you now also have the freedom to take everything you need for the journey. Because LevelVan, from E&P, is the first and only hydraulic levelling system with a total weight of less than 50 kg. And by using carbon cylinders, we have harnessed a strength-to-weight ratio that's hard to beat.

**Discover freedom. Discover LevelVan.**

## PRECISE, SMOOTH & QUIET **LEVELLING OF YOUR CAMPER VAN**

- | Optimum levelling accuracy & precision
- | Two levelling modes: auto-levelling and tank emptying position
- | Quality & reliability from the levelling experts
- | Smooth levelling with minimum torsion load on the chassis
- | Fully hydraulic

## SPACE-SAVING & SAFE **ASSEMBLY OF THE UNIT**

The system can be installed either in the vehicle interior or in the underfloor area of the van. The system is optimally protected against environmental impact.

---

**#CARBONLIGHT**

## INNOVATIVE CARBON CYLINDER TECHNOLOGY

LevelVan is the first levelling system with innovative carbon cylinder technology, which is hard to beat in terms of lightness.

**SUPER LIGHT**  
total weight  
under 50 kg

**INNOVATIVE**  
carbon cylinder  
technology

**WORLD'S FIRST**  
especially for  
camper vans

## SUPER LIGHT TOTAL WEIGHT FROM UNDER 50 KG

- | System weight incl. all components from less than 50 kg\*
- | LevelVan offers the ideal combination of lightness with maximum stability
- | More payload possible

# LIGHT LIGHTER LevelVan

\*System weight depends on installation position and vehicle variant
